

Akshat Agarwal

agarwalakshat2710@gmail.com — +91 7778841815 — Portfolio — GitHub — LinkedIn — Vellore, TN

Full-stack developer and pre-final year IT student at VIT Vellore with experience building and shipping scalable web applications in startup environments. Strong foundation in backend systems, APIs, and product-focused engineering with growing interest in AI systems, system design, and intelligent applications.

Education

Vellore Institute of Technology, Vellore — B.Tech. in Information Technology July 2024 – 2028

- CGPA: 9.31
- Relevant Coursework: Data Structures, DBMS, Operating Systems, Web Technologies

Skills

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, HTML, CSS

Backend: Node.js, Express.js, REST APIs

Databases & Caching: PostgreSQL, MongoDB, Redis

Tools & Platforms: Git, GitHub, Postman

Currently Exploring: AI Systems, LLM Applications, System Design

Experience

Samsung PRISM — R&D Intern May 2026 – Present

- Selected for the Samsung PRISM program under Samsung R&D Institute India - Bangalore (SRI-B).
- Working on a GenAI/LLM-based worklet focused on autonomous interaction management for dynamic site handling.
- Collaborating with Samsung R&D mentors and faculty members on AI systems and research-driven problem solving.

Metis Intellisystems Pvt. Ltd. — AI Engineering Intern May 2026 – Jun 2026

- Worked on developing AI-based solutions for the BFSI (Banking, Financial Services, and Insurance) sector.
- Contributed to AI-driven workflows and practical problem-solving for industry-focused use cases.
- Collaborated with the founding and engineering team in a startup environment on product-oriented AI initiatives.

Sstudize Labs — Software Developer Intern Mar 2026 – Present

- Built and shipped full-stack features for an AI-enabled EdTech platform serving 500+ students.
- Contributed to re-engineering and migrating the platform to a modern full-stack architecture, improving application performance, scalability, and overall response times.
- Worked on backend workflows, APIs, and database integration using Next.js, Node.js, and PostgreSQL.
- Collaborated within a fast-paced startup team to iterate on product features and improve user experience.

Centre for Social Entrepreneurship & Development — Senior Core Member Mar 2025 – Present

- Contributed to planning and execution of large-scale events while supporting technical operations and coordination.
- Contributed to building and deployment of the official event platform, handling 250+ concurrent users during peak traffic.
- Collaborated across multiple teams to streamline logistics, technical requirements, and execution workflows.

Projects

ThinkBoard – Full-Stack Note Taking Application

- Designed and implemented RESTful APIs using Node.js and Express.js with authentication and session management.
- Integrated MongoDB for persistent storage and implemented Redis-based rate limiting for backend stability.
- Built and deployed a responsive frontend using Next.js and React.

Line Up – QR-Based Queue Management System (Under Development)

- Developing a queue management platform enabling users to join queues through QR code scanning.
- Building an admin dashboard for queue tracking, notifications, and analytics.
- Working with PostgreSQL and real-time state handling for accurate live queue updates.

Movie Vault – Movie Library Application

- Integrated third-party movie APIs to fetch and display dynamic real-time content.
- Built a responsive frontend using React.js with asynchronous data handling and optimized state management.

Interests

Backend architecture, System design, AI systems, Building scalable products, Startup ecosystems
